JEF & JIM GORDON

Spring, 1984 - Arizona (?)

JEF: ...It's real slow.

JG: The masters are attempting to take man's consciousness one step further and ignite the spark of universal consciousness in man. But unfortunately, I have to open this door and so on - so that's where I stopped. But on the 19th is when I got back to it. I finally got some time again to sit and work on this a little bit now. (tape off) ...and in the hospital. They called yesterday and they might have to do a prostate surgery.

Let me go back to the universal consciousness idea for a moment for the masters that are hidden or the inner masters have shown me a great deal about how they and yet another group of masters on the astral plane have, throughout the evolution of man, have worked to help progress mankind from something just above the animal kingdom to where he is today. It is hoped that to further man's evolution over the next 2,000 years to yet a higher level. What they have shown me concerns the evolution of the emotional **nature** of man in the mental nature to the state it is today. They have taken mankind step by step to the doorway of universal consciousness. But enough of my rambling...and then they start dictating:

Beloved Sons and Daughters of Light and Service:

We wish to carry these ideas further and give a more clear picture than what has been presented above by Jim. Mankind began truly just above the animal kingdom with little more than just his individualized soul separating himself from the animals. We offer you now a picture of the changes mankind has gone through in his development.

Though we of the Inner Masters have worked from the mental levels ever helping to mold and shape the minds of men and aid in the evolutionary process, before our influence could truly be felt upon humankind, yet other influences had to raise man from his animal state and help man come more in contact with his human qualities. These masters worked from Three different standards of developmental influences.

The first group dealing with the evolution of man was that of hierarchy. This group has been involved with man and Earth's evolution since mankind began his sojourn here millions of years ago. Though the same masters are not now involved with hierarchical group as was in the founding of hierarchy, the principles for which it was founded have remained the same. They are to lay forth a path of evolution and advancement for mankind in the Earth and to help guide humanity ever forward upon its path of development out of its animal nature through its human nature and into its spiritual soul nature.... And that's when I had to go to work.

JEF: Yep, you had to go to work at that point. (Tape off)

JEF: This is really a beautiful setup. Your hair analysis in that file.

JG: I've done a few.

JEF: I see that you have. Gee, this store, though has just got everything in it hasn't it. (Tape off)

JEF: We're at the ice rink - kids are skating all over the place and you have the music in the background. (Conversation about skating)
